

DELTA BOX INSTRUCTIONS

Hold the Delta box with glyph facing up, fingers placed approximately as shown.

Spin top of box either direction, until lid clears the gaps on the base.

Separate! Show your friends, or let them figure it out. :)

Fits our Finishing Grinder perfectly – grind right into the Delta box! Holes in the top and bottom line up and create a hole to shake the contents into your Launch Box. *(Remember to rotate the lid after filling your trench to avoid accidental spills.)*
