

FOREVERTOP

"LAUNCH BOX ELECTRONIC HERB VAPORIZER"

foreVertop

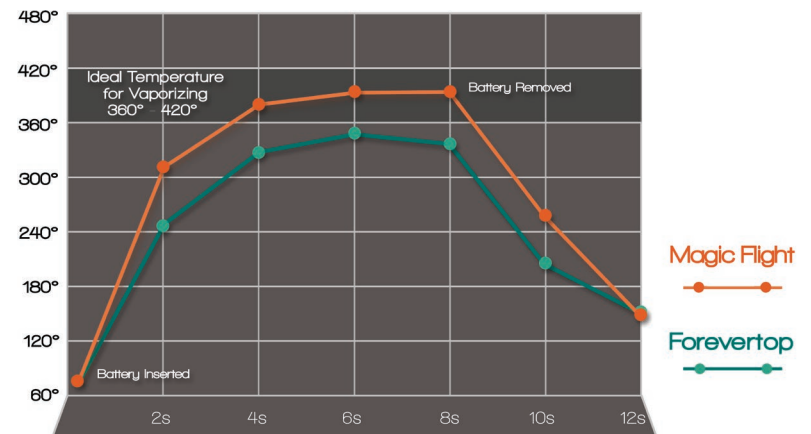

Manufactured in Shenzhen, China by Shenzhen Forevertop Electronic Technology Limited, this nondescript counterfeit is easy to recognize in person. However, auction website listings often misleadingly use Magic-Flight's product photography with glyph logo digitally removed from the unit and accessories.

- 1 Loose lid easily swings open.
- 2 Incomplete, weak bonds lead to low heat output.
- 3 Use of Magic Flight's product photography.
- 4 Forevertop's packaging is easy to identify in online and retail stores.

- **No click-lock and loose lid:** Lid easily slides open, spilling herbal product and not producing a good seal for stealthy vaping.
- **Poor construction:** Due to rough, machine construction, debris is found throughout unit.
- **Toxicity:** Based on the smell, quality, texture, and unknown manufacturing procedures, we warn against inhaling vapor from this counterfeit.
- **Screen issues:** The sparsely dotted bonds barely hold screen to the rails, which conduct heat through the unit. Also, the rough construction has created holes in the mesh screen. A shallow screen trench only leaves room for a very small amount of herbs.
- **Inadequate Heat:** Temperature trials consistently revealed that the Forevertop unit doesn't produce adequate heat to effectively vaporize herbal product.
